Resources from AACT for Online Chemistry Instruction

ACS Faculty Newsletter March 2020

In response to the growing need to teach chemistry remotely, [select AACT resources](#) are being made available to the chemistry community through March 31, 2020. These resources include activities, animations, projects, simulations, videos, and more for elementary school, middle school, high school, and Advanced Placement. Visit www.teachchemistry.org to access these resources.

For a guided tour of resources applicable for chemistry in a higher education setting, watch the 2019 AACT webinar, '[Highlighting AACT Web Resources for Introductory/General Chemistry](#)'.
