Subject: Are your lab courses being quarantined online? We can help

Dear Dr. <deleted>,

Recent events have challenged lab-teaching faculty to move their curriculum online for the remainder of the Spring term. Many are finding themselves searching for solutions that are easy to implement without having to invest a lot of time. To help, Catalyst Education offers a free, ready to use, [Labflow](#) course covering 3-4 weeks of online labs for general chemistry, introductory chemistry and organic chemistry.

Please join us tomorrow [Thursday](#) at 4 pm central (5 pm eastern, 2 pm pacific) or on [Friday](#) at 10 am central (11 am eastern, 8 am pacific) for an "Office Hour" webinar with Dr. James Caras. Jamie will demonstrate the no-cost courses designed for you to use this semester and discuss how [Labflow](#) has built-in features for sudden course cancellations and missed labs as a ready-to-go contingency plan for future terms.

Office Hours with Dr. James Caras

Thursday 4 pm central, click [here](#) to register.

Friday 10 am central, click [here](#) to register.

Catalyst Education's [Labflow](#) is created and supported by chemical educators such as yourself. With the recent outbreak of COVID -19 and cancellation of classes, Catalyst Education can help. Please click here to register for office hours with the founder.

Thank you,

[Dave Price](#)
