Here is another offer for a free product. I had an online meeting with Justin yesterday. I have used CHEM101 in my classes for the past two years and I really like the product. One of the most important features for us right now is the ability to author questions very easily. They have a nice toolbar that allows you to use subscripts, superscripts, symbols (Greek letters and others), and several reaction arrows (regular, equilibrium). You can also upload images to be used with the question. Questions can be a numeric answer or multiple choice. You can tailor the number of MC answers. You can tailor the grading tolerance on a numeric answer. Assignments can be timed. By the end of this week, you'll be able to randomize the question order if desired. It is free until the end of the term.

I did pass this along to most of the lecturers.

If anyone needs help with Sapling or CHEM101, I'd be happy to help them.

Susan

## Second Presentation: Webinar on Online & Remote Learning

*To the Chemical Education Community,*

*Due to overwhelming demand, I will be hosting a [second presentation](#) of our remote learning webinar this Thursday at 12 PM ET. Thank you to all who registered and attended yesterday's webinar! We are working as hard as possible to get a recording out but unfortunately, we are facing a Zoom backlog that is delaying the process.*

*We will again cover how Chem101 can help faculty with lecture, homework, quizzes, and practice activities/assessments for General Chemistry, Introductory Chemistry, and GOB Chemistry courses.*

*I will be available at the end of the presentation to answer any individual questions you may have.  
We will send out the eventual recording to everyone who registers, even if they can't attend.*

[Register for the Second Webinar](#)

*If you are interested in getting set up with free access to Chem101, you can reply to this email or write to us at [hello@101edu.co](mailto:hello@101edu.co) and our team will reach out to assist you ASAP.*

*Sincerely,*

*Justin Weinberg, PhD*

*Co-founder & CEO*

\*Zero cost access applies only to students who have not already purchased a Chem101 activation between January 1, 2020 and March 10, 2020.
